NOTICE

This is for the information of the general public that the Government of Sikkim has initiated the Agristack Farmers Registry under the Digital Agriculture Mission in collaboration with Government of India to create an accurate digital record of farmers, land and crops for better delivery of schemes, subsidies, insurance, disaster relief and other benefits.

In our district, this work is being carried out jointly by the Land Revenue & Disaster Management Department and Agriculture/Horticulture Department, Government of Sikkim. Field staff are visiting villages and farms to collect the required information.

All landowners and concerned citizens are kindly requested to cooperate with the field staff, provide correct information and extend full support for smooth data collection.
