

Press Release from Nutrition cell of Women Child Senior Citizen and Divyangjan Welfare Department
Anemia Camp Held at Tadong Senior Secondary School

Under the Malnutrition-Free Sikkim initiative, the Nutrition Cell has initiated anemia screening camps across the state. In view of this initiative, an anemia camp was held today, 8 October 2026, at the premises of Tadong Senior Secondary School.

The camp primarily targeted school children, whose hemoglobin levels were screened for anemia. Children identified with low hemoglobin levels were provided with dietary charts and iron-rich goodie bags, along with counselling by the Nutrition Educators of the Department.

The goodie bags contained various iron-rich and nutritious food items, including organic beetroot powder, multigrain satttu, Vitamin C tablets, dates, and other nutritional products.

The camp was also attended by doctors from AYUSH, who provided counselling to children identified as anemic and guided them on appropriate dietary and health measures.

The camp was led by Assistant Director Ms. Jyotshna Khatiwara, along with staff from the Urban Public Health Centre.
